WHAT IS: SOCIAL SCIENCE

Our science is world-changing, applicable and, above all, transformative.

The students, staff, faculty and alumni of the College of Social Science work every day to make our world a better place. From studying how sleep affects our brains to how policies affect our communities to how greenhouse gases affect our planet, social scientists seek to understand and solve the world’s toughest problems.

STUDENTS HAVE THE OPPORTUNITY TO:

• Conduct world-class research
• Engage in service learning
• Take classes all around the globe
• Test out the job market with an internship

 WHAT IS: ANTHROPOLOGY

Anthropology is the study of humanity’s cultural and biological diversity across time and space. It is an all-embracing discipline—it captures a variety of interests.

Anthropology has several subfields, including:
- Biological anthropology, which includes forensic anthropology, bioarchaeology, and human biology
- Archaeology
- Socio-cultural anthropology
- Medical anthropology
- Linguistic anthropology

UNDERGRAD PROGRAMS
Anthropology (Minor | BA | BS)

WHAT IS: CRIMINAL JUSTICE

Criminal justice is designed to prepare students for entry level positions in public and private agencies identified with criminal justice administration. Such agencies apprehend offenders, adjudicate alleged offenses, redirect emergent criminal careers, and promote industrial and commercial security. Such agencies also encourage and emphasize community responsibility for the success of their programs. We have the oldest degree-granting Criminal Justice program in the nation.

WHAT IS: ECONOMICS

Economics is the study of how various entities make choices with scarce resources. Microeconomics focuses on the choices made by individuals and firms, and macroeconomics looks at the behavior of the economy as a whole. The study of economics is one of the most practical and adaptable disciplines. Those who focus on it gain a broad skill-set that can be utilized in complex and changing environments, and that can contribute to the understanding and improvement of lives at the individual, group, organizational, and societal level.

WHAT IS:
GEOGRAPHY, ENVIRONMENT, & SPATIAL SCIENCES

The discipline of geography, as the study of place and space, concerns itself with the analysis and explanation of the occurrence, distribution, and interrelationships of physical and cultural patterns on the earth’s surface. The discipline is also interested in how the earth’s physical and human landscapes change over time. Geography can be classified both as a social science and a natural science as it examines human beings and their environment and serves as a bridge between the physical and cultural worlds.

WHAT IS:
HISTORY

All courses in history have the goal of helping students learn how to think and write historically in a critical manner. History courses emphasize learning how to identify viewpoints, gather and organize information, present conclusions in essays and on the internet, distinguish facts from interpretations, recognize historical relationships and patterns, and appreciate the relevance of historical insight to the understanding of current events and problems.

WHAT IS: POLITICAL SCIENCE

As a science, political science is concerned with theories, research methods, and facts as they relate to understanding political processes and phenomena. In particular, political science studies the distribution of power in groups, parties, institutions, governments, and international organizations. As a field of study, political science asks who has power, how did they get it, and why the exercise of power benefits some more than others. On both the American and international stages, political science prepares students to confront vital issues, raise critical perspectives, and explore new methodologies in the study of the fundamental concepts of power and change.

WHAT IS: PSYCHOLOGY

Psychology is a science concerned with thoughts, feelings, and behaviors. Psychologists study many topics including: how people perceive the world with their five senses; how people learn (and forget); how people relate to each other; how people develop their personalities; how people interpret and respond to social conditions; how organizations function; how to classify and understand the origins of psychopathology; how to intervene and treat psychological problems; how communities support health and well-being; and how non-human animal models can be used to understand human behavior.

What Is: Social Work

Social work is a profession that focuses on helping vulnerable and oppressed people improve their lives. Social work uses a wide range of approaches toward this end, with the intent of improving both personal life circumstances as well as the broader institutions and social forces that affect these populations. Our field stresses the interaction between the person and the person’s environment as we develop solutions. Social work is guided by a code of ethics that encompasses values fundamental to our practice, such as respect for diversity, self-determination, empowerment, and focus on the most vulnerable members of society.

WHAT IS:
URBAN & REGIONAL PLANNING

The School of Planning, Design and Construction uniquely unites four built environment disciplines to foster synergistic learning and collaboration: construction management, interior design, landscape architecture and urban and regional planning. The academic programs are accredited and produce career-ready graduates. Students work on real-world, cross-discipline projects and activities. The faculty cross-collaborate on pressing built environment issues, delivering timely and crucial sustainable research and outreach. The School of Planning, Design and Construction is administered jointly by the College of Agriculture and Natural Resources and the College of Social Science.

WHO I SHOULD CONTACT: ADVISORS

The College of Social Science Office of Student Affairs and Services is a central source of information and assistance for students in all departments and schools in the College. Academic Specialists are available to answer questions concerning College and University programs such as study abroad and internship preparation, to interpret college requirements, to explain academic policies and procedures, and to refer students to appropriate resources across the University. Additionally, students experiencing difficulties are encouraged to come to this office for assistance.

The Office of Student Affairs is here to help! Our knowledgeable staff can assist with academic matters, point to resources, and answer questions. We are located in 201 Berkey Hall.
